Quantitative Text Analysis: Classwork 5
Manifesto Coding - Database of Elections, Parties and Governments

Kenneth Benoit

In today's lab we will code political manifestos for the Database of Elections, Parties, and Governments. This object is to code individual sentences from UK manifestos on two dimensions - economically left/right, and socially liberal/conservative.

Instructions:

1. Open the registration page at the dpeg website

2. Choose 'sign up' and fill out the form

3. Log into the system with the details you just created.

4. Before you begin to code, read the instructions in the main panel carefully.

5. The link on the right of the page gives a typical definition of the four political dimensions
